

Gypsy Moth (*Lymantria dispar*) Regulated Articles

7 CFR § 301.45-1

Last update: July 19, 2006

1. Trees without roots (e.g., Christmas trees), trees with roots, and shrubs with roots and persistent woody stems, unless they are greenhouse grown throughout the year.
2. Logs, pulpwood, and bark and bark products.
3. Mobile homes and associated equipment.
4. Any other products, articles, or means of conveyance, of any character whatsoever, when it is determined by an inspector that any life stage of gypsy moth is in proximity to such articles and the articles present a high risk of artificial spread of gypsy moth infestation and the person in possession thereof has been so notified.
